

d4questions

Q- 41 → Among the following identify the one in which dimensionality reduction reduces.

Solution →

d) Collinearity

Q- 42 → Which of the following machine learning algorithm is based upon the idea of bagging?

Solution →

b) Random Forest

Q-43 → Choose a disadvantage of decision trees among the following.

Solution →

c) Decision Tree are prone to overfit

Q- 44 → What is the term known as on which the machine learning algorithms build a model based on sample data?

Solution →

.a) Data Training

Q – 45 → Which of the following machine learning techniques helps in detecting the outliers in data?

Solution →

.c) Anamoly detection

Q – 46 → Identify the incorrect numerical functions in the various function representation of machine learning.

Solution →

c) Case based

Q – 47 → Analysis of ML algorithm needs

Solution →

d) Both a and b

Q – 48 → Identify the difficulties with the k-nearest neighbor algorithm.

Solution →

c) Both a and b

Q – 49 → The total types of the layer in radial basis function neural networks is _____

Solution →

c) 3

Q – 50 → Which of the following is not a supervised learning

Solution →

d) KMeans
